profession  
2016**

Many roads are open for youth in our Republic. Anybody can learn at school, but it is not an easy thing to choose a future profession. Some people follow the advice of their parents. Others cannot decide even after leaving school.

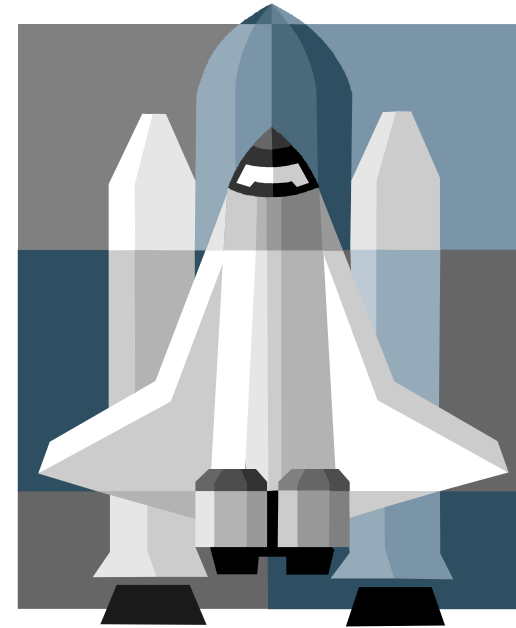

Every profession has its beauty and its difficulties. If you don't afraid of its difficulties you'll be masters of your profession. Is there anyone who doesn't dream of being cosmonaut, an actor, a writer, a scientist, and so on? But dreams are one thing and the actual, the real requirements of society are quite another.

I wanted to be a doctor  
and I achieved my  
dream. I am proud of  
my profession.

I walk about mayn wonderful  
places through my profession  
and I saw an interesting  
adventure.

**I want to build the  
big and  
beautiful building.  
I try to build the  
great building  
and I want to  
useful for  
every body.**

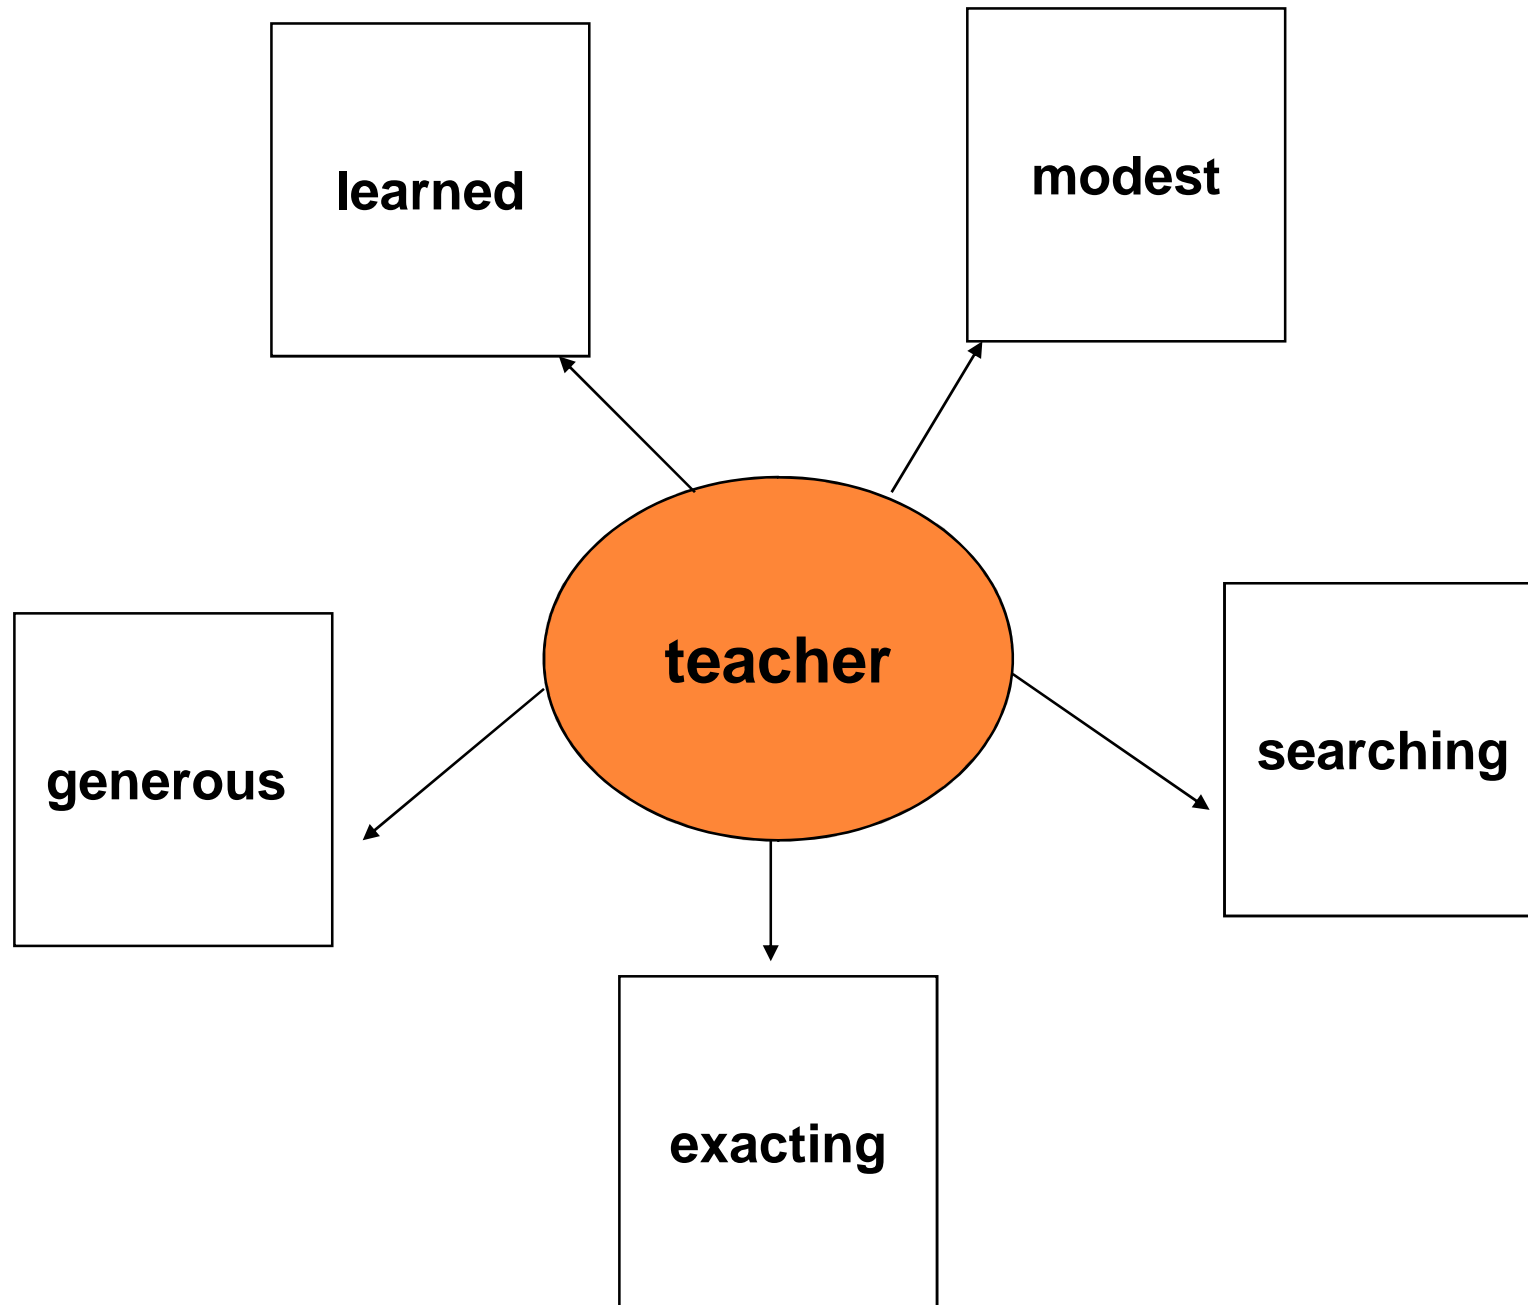

**I write about many  
themes,  
for example,  
the nature, the world,  
life, love and  
many other things.  
I want to write  
about love in my  
masterpiece.  
I try do it.**

**I want to teach  
pupils English  
language and to  
make a contribution  
to our republic.**
