Acronis Disk Directory dasturi orqali disklar bilan ishlash.

Bu dastur orqali ko'plab amallarni bajarish mumkin bo'ladi jumladan kompyuterda mavjud bo'lgan disklar ustida amallar bajarish mumkin bo'ladi ,masalan bizda mavjud bo'lgan disk hajmini o'zgartirish yani biridan ikkinchisiga olib o'tqazish mumkin bo'ladi.Uning ustida yana ko'pab amallarni bajarish muki bo'ladi .

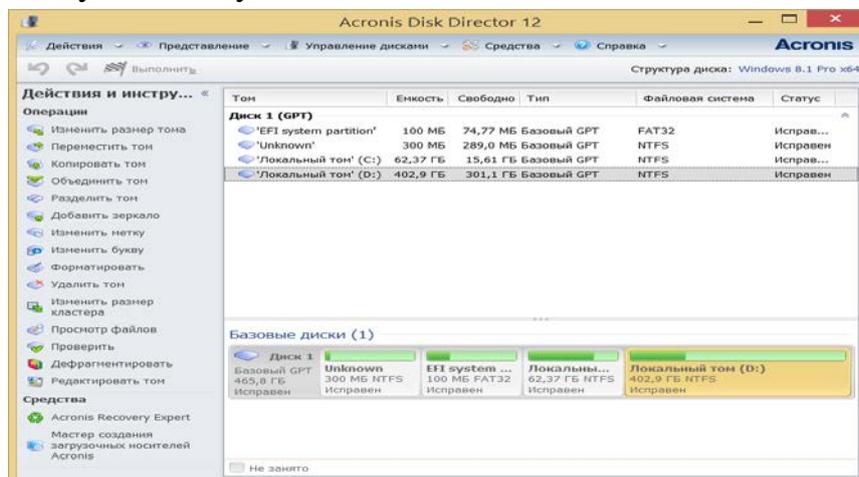

Ishni bajarish tartibi .Dastlab bu dasturni kompyuter qurilmasiga o'rnatamiz.

So'ngra uni ishga tushiramiz.

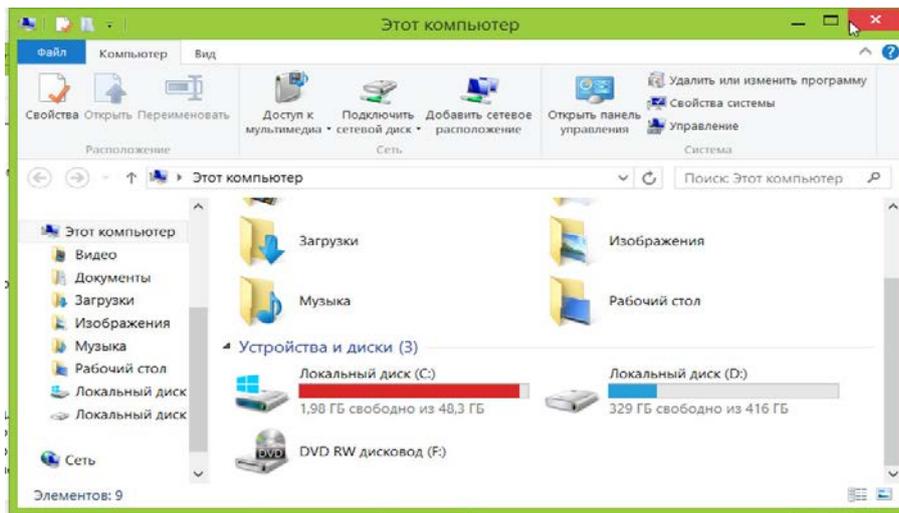

Dasturni interfeysi ushbu ko'rinishda namyon b'ladi .

Agar biz biror disk ustida amal bajarmoqchi bo'lsak, uning ustiga sichqoncha tugmasini ikki marta bosamiz va chap tomonda ko'rishimiz mumkin bo'ladiki amal bajarishimiz mumkin bo'lgan ro'yxat namoyon bo'ladi.

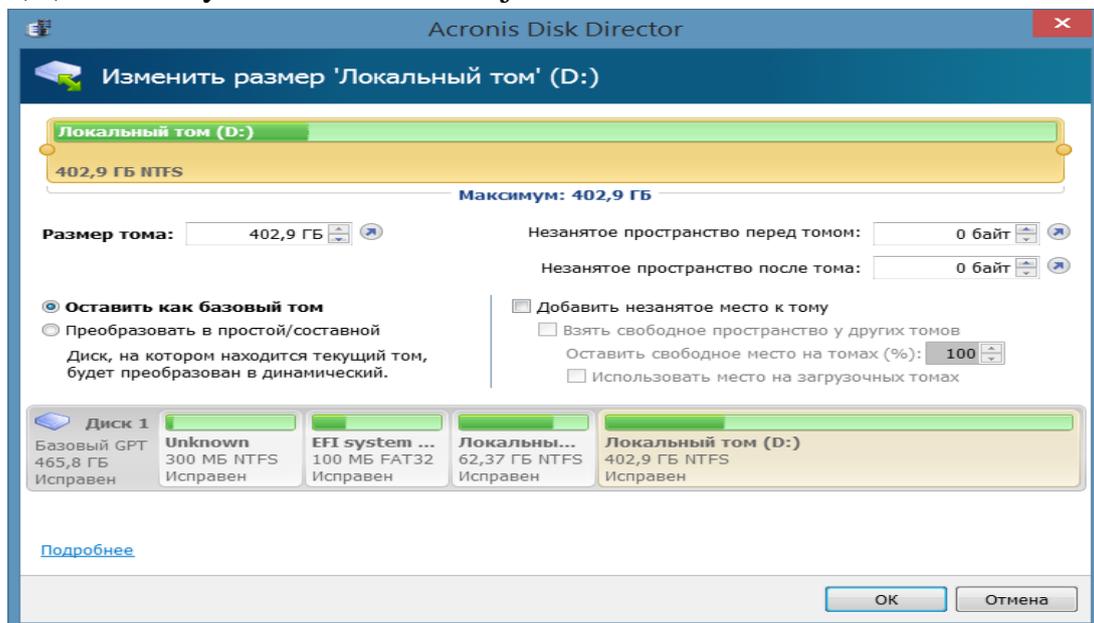

Biz (D) diskni tanadik va ko'rib turganimizdek chap tomonda bo'limlar paydo bo'ldi .

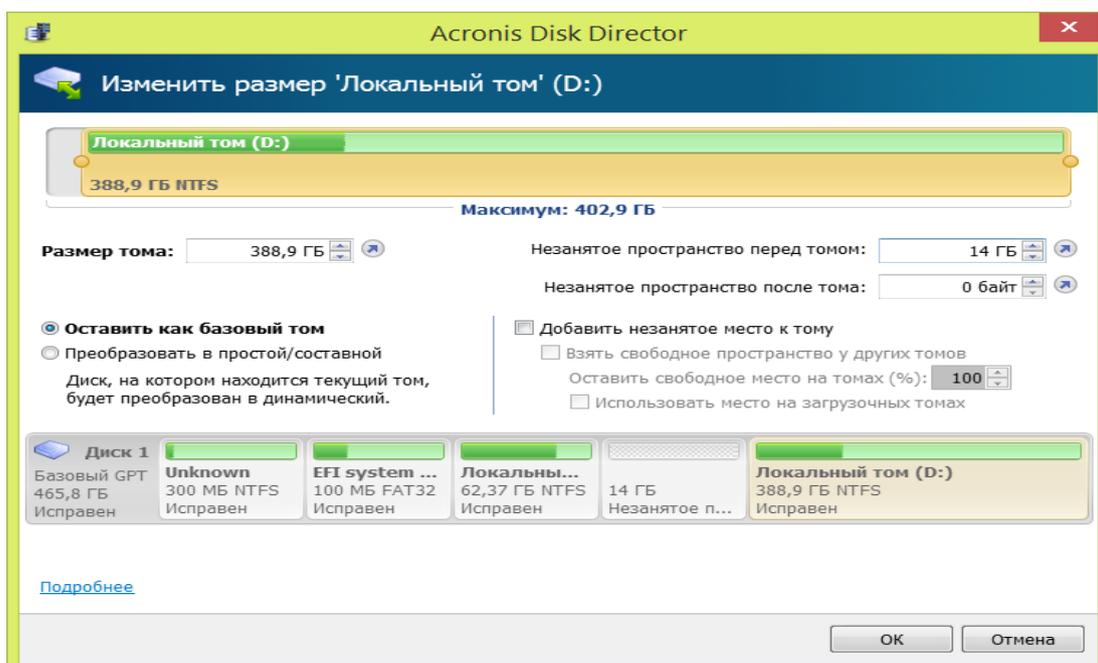

Ko'rib turganimizdek xolatni bartaraf etish ya'ni mavjud (C) disks xotira hajmi to'lib qolganligi sababli qizargan rangdagi ko'rinishga kelgan .Bu xolatni bartaraf etish uchun quyidagi ketma ketlikni amalga oshiramiz.

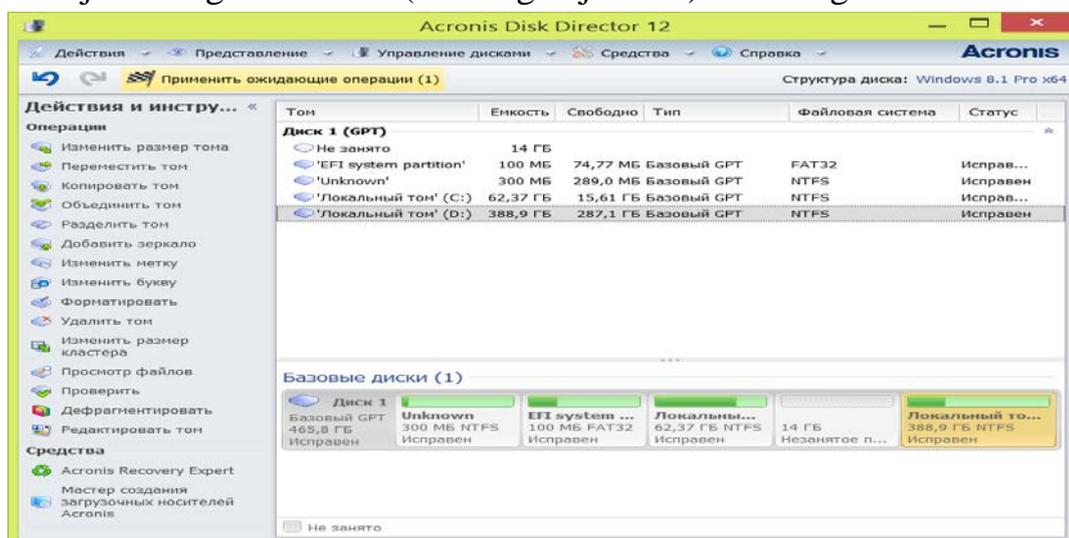

Dastlab (D) diskdan yetarlicha xotirani ajratib olamiz.

Yuqorida ko'rsatilgan rasmdagi chap tomonda keltirilgan buyruqlardan birinchisiga kiramiz.(Изменит размер тома).

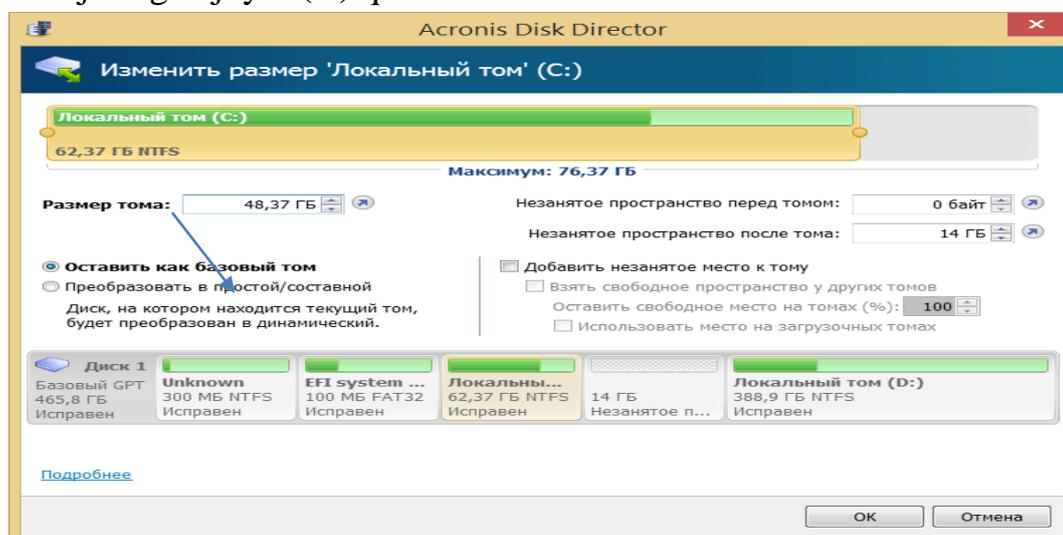

Yetarlicha hajmni belgilab olamiz (biz 14 gb ajratdik.) va ok tugmasini bosamiz.

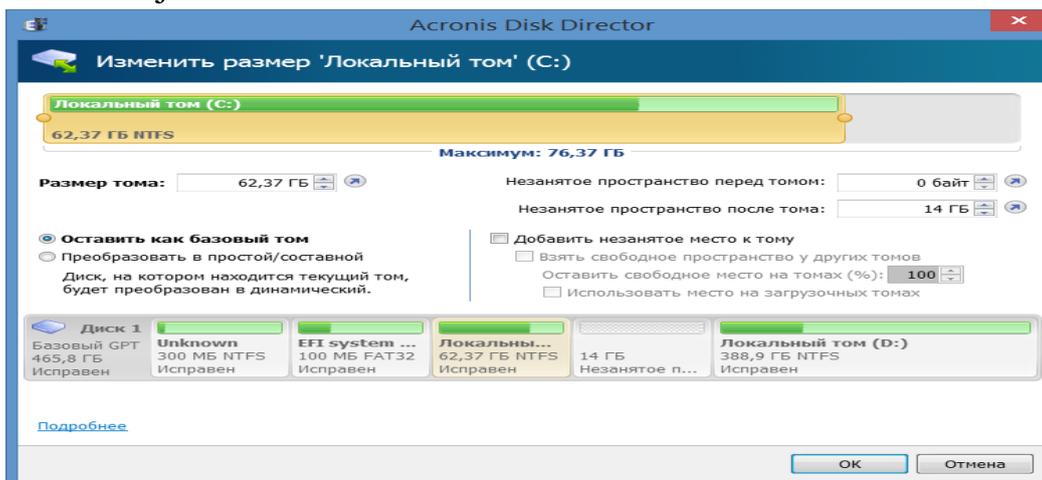

Ajratilgan diskni ko'rishimiz mumkin.

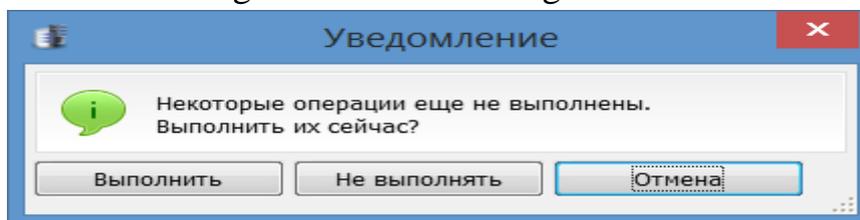

Endi esa bu ajratilgan joyini (C) qo'shib berish muki.

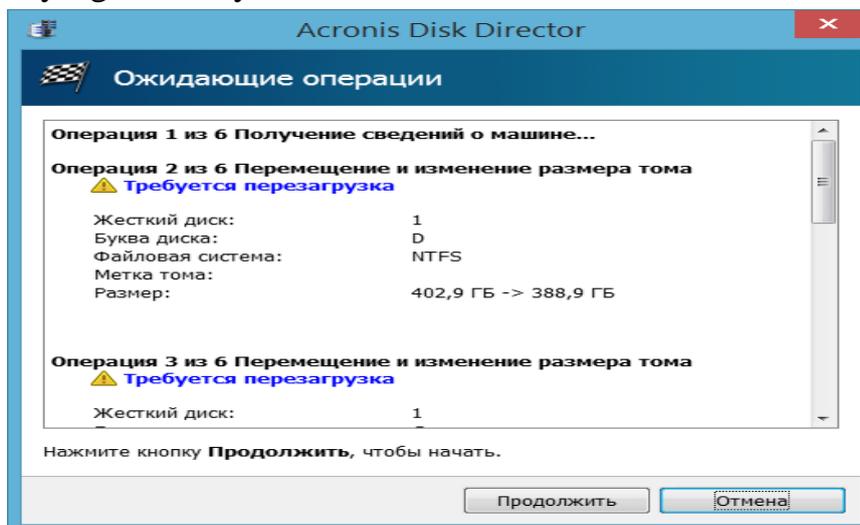

Endi esa (C) disk ustida amal bajaramiz ko'rsatilgan belgi ustiga sichqonchani bosish orqali bu amalni bajarish mumkin bo'ladi.

Ko'rinib turibdiki o'lcham o'zgardi. Endi esa ok tugmasini bosamiz.

(выполнить) buyrug'ni tanlaymiz

(Продолжить) buyrug'ini tanlaymiz va kompyuterda uchta operatsiyani bajarib (C) xotirasi o'zgartirganimizni ko'rishimiz mumkin bo'ladi.
